

## **Welcome Letter** **Superintendent's Message**

Tri-County Career Center and the Board of Education are very proud of the educational opportunities available at the center for both adult and high school students.

Tri-County Career Center has been offering career and technical training in Southeastern Ohio, for both High School and Adult Education for 50 years. We help high school students prepare for post-secondary education, workforce preparation, and/or the military. Many of our students earn college credit while attending our center through agreements with Hocking College and Ohio University.

We are ready for you to start your career with us. We offer internships, job shadowing, and “On the Job” training as part of the experience at Tri-County. Students are able to complete their high school diplomas while advancing themselves in a chosen career or vocation and earn industry credentials. We have a great job placement rate with opportunities for students to thrive in the workforce of their career area. High school students also learn the value of competition and participate in many skill events through the year, in organizations such as BPA, SkillsUSA, FCCLA, and FFA. Please take time to explore our awesome website for more details.

Our Adult Education Program is a leader in workforce development training in Southeastern Ohio. The Adult Education Program provides customized training for current employees in business, short-term career enhancement training, and career development programs for new workers, and those individuals seeking an occupational change. You can find out more information about Adult Education Programs by going to the Adult Center tab on this page.

This website is designed to be a valuable source of information; we hope you get the opportunity to visit our outstanding High School and Adult Center. If we can be of assistance in any way, please do not hesitate to contact us.

Sincerely,

Connie L. Altier  
Interim Superintendent
